

SafetyRailCompany

Fall Protection for Life and Compliance

YOUR PARTNER AT EVERY STEP

WHO WE ARE

We are **SAFETY RAIL COMPANY**, a manufacturing company comprised of innovators, engineers and problem solvers. The SRC team is dedicated to partnering with you to provide high quality fall-protection solutions coupled with exceptional service and support.

Our approach eliminates confusion and ambiguity associated with OSHA compliance and project specifications. From start to finish, we offer concise planning, cost-effective products and professional support.

Let SRC be your partner for effective risk management.

CLEAR

- COMPREHENSIVE PROJECT PLANNING
- JOB SITE CAD MODELING
- OSHA COMPLIANCE EXPERTISE
- TRANSPARENT COST STRUCTURE

CREATIVE

- INNOVATIVE PRODUCT DESIGNS
- NO-TOOL MODULAR SYSTEMS
- SATELLITE IMAGING TOOLS
- CUSTOM SOLUTIONS

COMMITTED

- PREMIER CUSTOMER SERVICE
- CONTINUOUS IMPROVEMENT
- UNMATCHED PRODUCT QUALITY
- DOMESTIC MANUFACTURING INTEGRITY

“ Now that we've partnered with Safety Rail Company, we are able to start and finish a safety project with just one supplier. In the past we had to involve engineering firms, project managers, bid writers, general contractors and subcontractors for custom on-site fabrication ending in cost and deadline over-runs. With Safety Rail Company, we are on time, on budget and with great quality. I know the solutions are safe and OSHA compliant. ”

WHY PARTNER WITH US?

We start by being the industry leader in quality. We differentiate ourselves further by our commitment to service. We create clarity out of the complex. We are passionate about safety. We are committed to long-term relationships and integrity. We are a highly focused group ready to partner with you on your fall-protection project.

QUALITY

- PROUDLY 100% MADE IN USA
- AMERICAN WELDING SOCIETY CERTIFIED WELDING FABRICATOR
- 100% OSHA COMPLIANT PRODUCTS

“ They always answer the phones. My orders ship promptly and accurately. The project plans they provide makes installation a snap. ”

BEST PRODUCTS
BEST PARTNER

PRODUCTS

- EXTENSIVE READY-TO-SHIP INVENTORY
- STANDARDIZED PRODUCTS DESIGNED TO FIT COMPLEX INDUSTRIAL ENVIRONMENTS
- POWDER COAT, STAINLESS STEEL AND GALVANIZED FINISHES AVAILABLE

ENGINEERING SERVICES

- QUOTE-STAGE PROJECT MODELING
- FULL 3-D CAD MODELS
- DEFINED BILL OF MATERIALS
- CUSTOM SOLUTION FRIENDLY

OUR PRODUCTS

At SRC, every product is designed for simple installation and flexible integration into any commercial or industrial application. All of our products work together to create a comprehensive fall-prevention solution.

“ Our maintenance staff had to frequently perform preventive maintenance on our rooftop yet they were often caught not using their fall harness systems or were using them incorrectly. We chose portable safety rail instead. It was easy to install, did not penetrate the roof membrane... and I have peace of mind knowing our staff is truly safe. ”

PORTABLE RAIL

SRC portable safety rail allows installation of an OSHA compliant rail system without tools, welding or drilling. No roof membrane penetrations. The SRC cast iron bases are simply placed along the fall perimeter and the steel rail is pinned in the base.

- Easily installed by in-house maintenance personnel
- Available standard in 1 foot increments from 2 through 10 feet
- Will not damage single membrane roof systems
- Used as a permanent and portable rail solution

PERMANENT RAIL

Permanent guard rail allows installation of an OSHA compliant rail system without costly on-site fabrication. Safety Rail Company offers many brackets to accommodate various mounting preferences.

SAFETY GATES AND LADDER GUARDS

A simple, yet cost-effective strategy to ensure worker safety in controlled work zones and transition areas.

HATCH GUARDS AND SKYLIGHT COVERS

Non-penetrating solutions for commonly overlooked fall hazards. No drilling or assembly required.

CROSSOVER LADDERS AND MEZZANINES

Modular and custom configurations to gain safe access over pipes, obstructions or fall hazards.

FIXED AND CAGED LADDERS

From simple fixed ladders to complex, caged ladders with integrated rest platforms, SRC has your solution.
